

DO'S AND DON'TS OF COLLECTING

DO'S DO'S DO'S DO'S

Do wear SAFETY GOGGLES - your eyes are precious - our rocks are hard - and mining companies INSIST that you wear them on all properties.

Do obey the time limits of your itinerary. When the supervisor blows his whistle, head for your car.

Do stay away from posted and dangerous areas.

Do wear sturdy shoes - our rocks are rough and hard to walk on.

DON'TS DON'TS DON'TS DON'TS

Don't enter posted or danger areas as these have been surveyed by safety engineers. To do so will subject you to dismissal from our collecting group.

Don't collect above or below another person on the piles, as this is one of the greatest forms of danger existing on the piles of this area.

Don't go near open shafts or deep pits or in wire enclosures.

Don't go near working machinery and stay away from idle machinery.

Don't go back to a certain collecting area on your own, as you would seriously disrupt our planned schedules.

Don't spoil your vacation by becoming a field trip casualty.

Don't get mad if you don't find anything - we've had the same luck for years
